

Here is a baking maths problem!

Andrew decorated 20 biscuits to take to a party.

He lined them up and put icing on every second biscuit.

Then he put a cherry on every third biscuit.

Then he put a chocolate button on every fourth biscuit.

So there was nothing on the first biscuit.

How many other biscuits had no decoration? Did any biscuits get all three decorations?

How will you work this out? Will you draw it, or use symbols? Maybe you could make the problem out of playdough!

Choose a plant and create a picture of it. You can decide whether to paint, draw or make a collage.

Explore the flowers in your garden or local park. Create a bar chart to show the different varieties and the quantity of each type. You only need to choose your favourite 5!

Investigate the Indian Flag. What does it look like and what do the colours and pictures mean? Draw it here.

## Saint George and the Dragon

Paolo Uccello

What can you see?      What does this tell you?

What are you wondering?

Discuss this picture with an adult. You might like to find out more about St George or you jot down your ideas around the picture. What do you think they might have said to one another?
